Meal Stacking (For Kids)

Meal stacking is the art of intentionally combining specific foods to match and elevate your current mental or emotional state.

💡 **Parent to Parent:**

This *can* be easy.

It can taste good.

It can feel like love—because it is.

And when the whole family eats this way you just have to be strategic and intentional as always.

Input = Output

How you do one thing is how you do everything.

🎯 **TIPS & TRICKS TO KEEP KIDS SASS-TRIFED**

2. SWEETEN IT NATURALLY, ALWAYS

Use **raw honey** and **ripe fruit** to satisfy their sweet cravings *before* they ask for junk.

- Add a swirl of honey on pancakes, cheese, or yogurt.
- Use sweet fruit (banana, mango, strawberry) as your lead flavor profile.
- Make everything *look* like dessert—even if it's a full meal.

3. LET THEM "BUILD THEIR OWN"

Autonomy = compliance. Code

Here's how to

Offer option

- Set up a "smoothie station" with 2 fruits and 1 milk.
- Put out 3 protein options, let them choose 1.
- Offer 2 dips: Honey Mustard or Ketchup + Honey.

✅ *Kids love control—give them guided control over food, and they'll be more likely to eat what you want.*

4. EAT WITH THEM

Model the behavior.

- Take a sip of your own smoothie and say, "Man, this makes me feel sharp."
- Take a bite of beef and casually drop, "This stuff builds my brain like Legos."

✅ *They don't need convincing. They need to see you thriving.*

5. NEVER SHOW THEM WHAT YOU HID

- Egg yolk? Blended.
- Collagen? Mixed in.
- Liver powder? Disguised under cheese or in burger patties.

✅ *This isn't deception—it's delivery.*
